ILLUSTRATED PARTS BREAKDOWN

TECHNICAL MANUAL

This parts list applies to most Bell & Howell Model "C" type printers manufactured since 1969. This parts breakdown originally included some sub-assemblies which are no longer manufactured. In these cases, we have deleted the section to avoid mis-identification. If you cannot determine the part number that you require, please order by description. Parts unique to particular models are designated as follows:

CODE MODEL NO. DESCRIPTION

A 6100C(X) 16MM Additive Color Printer with Standard Reader

B 6100CH(X) 16MM Additive Color Printer with Hi-Speed Reader

AB 6100 ATL 16MM "C" Type Printers

C 6200C(X) 35MM Additive Color Printer with Standard Reader

D 6200CH(X) 35MM Additive Color Printer with Hi-Speed Reader

CD 6200 ATL 35MM "C" Type Printers

E 6101C(L,S,X) 16MM Sound Heads

F 6202C(L,S,X) 35MM Sound Heads

G, H 6395 R.F. Cues

The part number column contains Bell & Howell part numbers, vendor part numbers, and for commercially available hardware, the word COML. When requesting parts from Bell & Howell, the Bell & Howell part number should be used. The Bell & Howell part number can be identified as a six digit number always beginning with a 3 or an 03. When the Bell & Howell part number cannot be found in the part number column, it will be found in the description, usually as the last item.

For parts that are peculiar to the Printer Control Unit (Model CL printers) see the separate PCU section.
